Scan launches new IT security system

PETALING JAYA: Scan Associates Bhd has launched the Shared Security Services (S3) to address the growing need for IT security from companies which are increasingly dependent on IT systems and utilise the Internet to provide online services.

The S3 aggregates and integrates all existing security services into a single platform so that security management is made easier and cheaper in the long run.

“In non-technical terms, it is like having a capable and experienced security manager who manages the various aspects of IT (information technology) security for an enterprise,” the company said in a statement yesterday.
